

Plate Compactor

PTH Compactor

The PTH Compactor is a powerful plate compactor with hydraulic side shift for compacting slopes and Attachment to tractors, excavators & co.

The PTH Compactor is characterized by its first-class efficiency, the simple attachment and its solid construction.

min. 100 HP
2.550 mm

Standard features

- + Grouping of 3 vibratory plates
- + first-class efficiency
- + Driven by 3 hydraulic pumps via a drive shaft
- + Wear-resistant special cast vibratory plate
- + Three-point mounting frame for tractor use
- + contrary motion of the eccentric shafts
- + complete vertically-oriented vibration and compaction effect
- + On-board hydraulic system with 95 l built-in hydraulic tank
- + Oil cooler with fan and protective enclosure
- + Hydraulic motors connected in parallel (1 pump per motor)

Technical specification

Power requirement	min. 100 HP
Operating weight	2.600 kg
Working width	2.550 mm
Working depth	max. 550 mm
Vibration system	adjustable
Frequency	25 - 60 Hz
Amplitude	2,12 mm
Centrifugal force	3 x 75 kN
Attachment	3-point

Special equipment

- o Shunting left/right 350 mm
- o Special paint according to RAL specification
